PROJECTS

E-commerce: *[GitHub Link][Live Demo]*

- An e-commerce website is one that allows people to buy and sell physical goods, services, and digital products over the internet rather than at a brick-and-mortar location.
- In this project I used React hooks, redux-toolkit and used firebase for authentication.

Blog-App: *[GitHub Link][Live Demo]*

- A blog application is a web or mobile application with two sets of users: bloggers and readers. Bloggers use the app to create posts, edit posts, and submit posts for review by their editors.
- In this project I used React hooks and used firebase for authentication.

Travel-Booking: *[GitHub Link][Live Demo]*

- A tourism or travel website serves as an information hub for prospective travelers planning a getaway. My website proved the customer to clear route of your travel plan.
- In this project I used React hooks and used firebase for authentication.
