PROJECTS

E-commerce: *[GitHub Link][Live Demo]*

- An e-commerce website is one with good user experience to see the product and allows people to buy products.
- In this project I used React hooks, react-router-dom, redux-toolkit and used firebase for authentication to login to Google and to proceed to the payment.

Blog-App: *[GitHub Link][Live Demo]*

- A blog application is a web or mobile application. Where the reader can easy to read the post and with minimal-style user can easy to browse through their favorite articles.
- In this project I used React hooks, react-router-Dom and used firebase for authentication of Registration form where user can register and login to the webpage.

Travel-Booking: *[GitHub Link][Live Demo]*

- A tourism or travel website serves as an information hub for prospective travelers planning a getaway. My website proved the customer to clear route of your travel plan.
- In this project I used React hooks and used firebase for authentication.
